Buddhist Buildings The Architecture Of

Buddhist religious architecture developed in the Indian subcontinent. Three types of structures are associated with the religious architecture of early Buddhism: monasteries, places to venerate relics, and shrines or prayer halls, which later came to be called temples in some places. The initial

As Buddhism spread from India to East Asia the existing architectural styles were blended with the stupa to create the pagoda design. Buddhism struck China first, from where it filtered through to Korea and Japan. Therefore, East Asian pagoda architecture is heavily influenced by Chinese design, in particular, the traditional watchtower.

Todaiji (“Great Eastern Temple”) in Nara is one of the most historically significant and famous Buddhist temples in Japan. The temple was built in the 8th century by Emperor Shomu as the head temple of all provincial Buddhist temples of Japan.

Today little remains of the original buildings of Todaiji.
