Algebra by Design, 1990, Russell F. Jacobs, 0918272173 ...

It covers topics usually contained in the second-year algebra course. However, there are many activities that can be handled by students who have completed only a one-year course in algebra. Each teacher who is planning to use Algebra II Topics by Design should examine each page of exercises to determine if they are suitable for his or her students. Often a few minutes of review or a short discussion of topics new to students will enable them to complete a set of exercises successfully.

Middle School Math by Design - Tessellations

Designs in the Coordinate Plane by Russell F. Jacobs This activity book, along with Symmetry in the Coordinate Plane represent a slight departure from our other "design" books. The student is required to work a set of math exercises in order to define a set of ordered pairs of numbers.

Designs in the Coordinate Plane

Algebra I Topics by Design \$19.95 By Russell F. Jacobs. "Algebra I Topics by Design" contains 42 activity pages covering topics found in most first-year algebra programs. There is no repetition of exercises found in "Algebra by Design" and "More Algebra by Design", and in general the exercises in this new book are at a higher level of difficulty.

Jacobs Publishing "Design" Books

Algebra moves students beyond an emphasis on arithmetic operations to focus on the use of symbols to represent numbers and express mathematical relationships. Understanding algebra is a key for success in future mathematics courses, including geometry and calculus. Many mathematics experts also consider algebra knowledge and skills
