2. SPRING AND VALVING ADJUSTABILITY. One of the many reasons anyone purchases a set of Volvo 850 coilovers has commonly been to lower the car. The lower center of gravity will help reduce excessive body roll and improve performance. Having the adjustability for ride height, spring preload and damping are essential features of a high quality coilover.

Let's talk rear shocks. I replaced the rear shock absorbers and mounts on my '97 850 wagon GLT at ~147K miles yesterday. I was replacing the shocks because they were good and worn out, with sagging rear suspension height (~ 1-2cm of sag), visible leaking oil on the outside of the shock tubes, and rubbing of one of the tires on the inner upper plastic wheel well liner when going over bumps.
